

Thanks for your order!

Electroniq Buttons Boutique*
(Dated: June 28, 2026)

Hi! Thanks for ordering a manual preconditioning kit from us! This has been a wild ride: in March, we isolated the CAN messages necessary for preconditioning, and today we're shipping you a kit. We're still learning, so we would appreciate any feedback you have: feel free to email us at info@electroniqbuttons.com. It's also important to us that everything works. Please email us at support@electroniqbuttons.com

(a) Install Guides

(b) Manual

(c) Email List Signup

(d) Fluxer Community Invite

Please check out the install guides (1a) and the manual (1b). Note that these are live documents and will be regularly updated.

We will be releasing lots of firmware updates, so we hope you'll join either our email list (1c) or Fluxer community (1d) to receive notifications of future updates.

Happy preconditioning!
