

Thanks for your order!

Electroniq Buttons Boutique*
(Dated: August 23, 2026)

Hi! Thanks for ordering a car-hacking kit from us! Our documentation for this product is still under heavy revision, so check back frequently. If there's a hole in the documentation that you're interested in filling, we welcome contributions! We're still learning, so we would appreciate any feedback you have: feel free to email us at info@electroniqbuttons.com. It's also important to us that everything works. Please email us at support@electroniqbuttons.com if that's not the case.

Included in the car-hacking kit:

1. (if selected) 1 WiCAN-OBd-C3 flashed with the latest beta firmware
2. 1 custom harness for the central CAN hub (ICU or CCU)
3. Mounting supplies:
 - (a) 1 60mm OBD mount bracket
 - (b) 2 pieces of double-sided adhesive, cut to 60mm (1 extra in case of mishaps; email us if you need more)
 - (c) 4 zip ties

(a) Install Guides

(b) Manual

(c) Email List Signup

(d) Fluxer Community Invite

Please check out the install guides (1a) and the manual (1b). Note that these are live documents and will be regularly updated.

We will be releasing lots of firmware updates, so we hope you'll join either our email list (1c) or Fluxer community (1d) to receive notifications of future updates. Happy car-hacking!
